

Harbour Meter Testing

Meter-services agreement - Synthetic demonstration data

Contract: CTR-004 **Version:** 1.0

Customer: Example Energy

Effective: 1-31 August 2026, inclusive.

1. Service and standard price

The agreed service is meter accuracy testing. Each completed visit costs GBP 75.00 before VAT, subject to the specific approval in clause 5. Each job reference identifies one physical visit.

2. Cancelled and incomplete visits

A cancelled visit has a fixed charge of GBP 0.00. Incomplete visits have no charge. There are no other cancellation conditions or minimum charges in this fictional agreement.

3. Evidence and period

The service record must identify the job, service date and status. Completed visits require a completion reference. Only services dated in August 2026 belong to this invoice. Missing records require further evidence; they must not automatically be treated as zero-cost work.

4. Billing once

Each job may appear once only. For duplicate reconciliation, retain the earliest invoice line number and flag later charges for the same job. No previous invoices exist for this scenario. All quantities are one.

5. Specific written approval

Approval APP-004-012 authorises a supplement of GBP 25.00 for completed job C04-JOB-012 only, giving an agreed total of GBP 100.00. This clause constitutes the complete fictional approval record.

6. Review and currency

Monthly invoices are reviewed against this agreement and service records. Flagged amounts require investigation and are not realised savings. All amounts are GBP before VAT. CSV monetary values are integer pence. VAT, gross payable totals and payment processing are excluded.

7. Fictional status

All organisations, jobs and identifiers are synthetic demonstration data. This document is not a real agreement or payment authorisation.
