

Meter-maintenance agreement

Synthetic demonstration data

Contract: CTR-001 **Version:** 1.0

Customer: Example Energy

Contractor: MeterCare Services

Effective: 1 August 2026 to 31 August 2026, inclusive.

1. Scope and identifiers

This fictional agreement covers standard meter-maintenance visits performed during August 2026. Each physical visit has one unique job reference. Repeat visits require separate job references. A meter reference identifies the serviced asset.

2. Agreed price

The charge for each completed standard maintenance visit is GBP 50.00 before VAT. The price applies to the service date. No minimum-volume charge, travel supplement or other standard fee applies.

3. Completion evidence

A visit is chargeable only when its service record has status completed and includes a completion reference. Cancelled and incomplete visits are not chargeable. If the service record is missing, the charge remains unverified pending evidence; absence of a record alone does not establish that work was not performed.

4. Single billing

Each completed job may be billed once only. The invoice must include a unique line reference, job reference, service date, service type, quantity, unit rate and line amount. A repeated charge for the same job is a duplicate. For reconciliation, retain the first occurrence by invoice line number and flag later occurrences. There are no earlier invoices in this demonstration period.

5. Additional work and amendments

Additional work or a change of price requires separate written approval identifying the job, service and authorised amount. No such approvals or amendments apply to this demonstration. The standard service is meter maintenance and each visit has quantity one.

6. Monthly invoice and review

The contractor issues one invoice for the service period 1-31 August 2026. The customer compares the invoice with this agreement and the service records. Differences require review and, where appropriate, supporting evidence or a corrected invoice. A flagged amount is not a realised saving.

7. Currency and demonstration limits

All amounts are GBP and exclude VAT. Tax calculation and payment processing are outside this demonstration. CSV monetary values use integer pence: 5000 represents GBP 50.00. All organisations, identifiers and service records are fictional. This document is not a real agreement or payment authorisation.
